

Dutch Nutritional Science Days 2022

Registration

Please pay attention to the following points:

1) Registration

Please register **before July 1st** (registration form) and indicate who will give a presentation – whether or not in the context of the Foppe ten Hoor prize. We must pass on bookings for overnight stays to Kapellerput at an early stage in order to make rooms reservations. Room sharing is strongly encouraged (costs are lower).

2) Payment

After registration we will send an invoice that must be paid within 4 weeks. For correct processing of the payment by our financial administration, name, address and possible reference number are necessary (see the registration form).

If the payment is not received on time, we are forced to withdraw the registration and to cancel any reservation for rooms and meals.

As in previous years, the organization has to pay what is stated on the registration form, even if someone will not use meals or accommodation. As a result, refunds are not possible in the event of cancellation from 6 weeks before the start of the meeting.

3) Presentations

On the registration form you can indicate who will give a presentation (please state a clear title of the presentation). The following conditions apply for the presentations:

- a) Topic must be related to nutrition
- b) Presentations must be given in English
- c) No protocol discussions
- d) Please disclose any *conflicts of interest* and *funding*
- e) No profiling of commercial interests during the presentations. In research with commercial products, the product name may be reported, but there must be full access to the composition of such products. If the composition is not allowed to be disclosed, no presentation can be given.

If there are too many registrations, we will make a selection. Important selection criteria include the nutritional content of the presentation, as well as the number of presentations per group. Preference will be given to PhD students and junior researchers over more senior researchers and Master's students.

Junior researchers who intend to compete for the Foppe ten Hoor prize (see below) must indicate this on the application form.

4) Foppe ten Hoor award 2022

As in previous years, junior researchers can apply for the Foppe ten Hoor Prize 2022. We ask the senior researchers/project leaders to encourage the most talented and promising PhD students to submit an abstract.

The procedure is as follows:

- a) Send in an abstract and short CV **before July 1st** to info@voedingsacademie.nl.
Clearly state in the subject that it concerns the Foppe ten Hoor prize.
Submission/abstract criteria:
 - i) Submitter has previously presented or participated during the Dutch NSD
 - ii) The supervisor/senior researcher guarantees that the entrant belongs to the top of his/her generation
 - iii) The subject for the Foppe ten Hoor prize **must** have a clear nutritional character.
 - iv) It concerns unpublished and stand-alone research (i.e. not an entire dissertation)
 - v) Abstract max. 350 words, in English, AJCN style (with Background format, etc.).
- b) The jury (Eva Corpeleijn, Jogchum Plat, Margreet Olthof, Marco Mensink en Joline Beulens) will nominate three researchers on the basis of the submitted abstracts and the accompanying CV. The supervisor may also be contacted in this regard. These three researchers will then be asked in the evening program of Thursday to present the research described in the abstract (15 minutes presentation plus 10 minutes discussion). The presentations of the abstracts that have not been nominated will be scheduled in the regular program.
- c) After the three presentations, all senior researchers present will grade the presentations anonymously (senior researchers who have close contact with the nominees are not allowed to vote).
- d) The chairman then announces the winner of the Foppe ten Hoor Prize and awards the three prizes (€50, €100, and €150).

5) Presence of senior researchers (PIs/supervisors)

The organisations wants to invite all senior researchers to be present during the entire retreat (including the workgroup leaders meeting on Friday). After all, the importance of the Dutch NSD is largely determined by the interaction between young and more experienced researchers.

6) Finally

We ask all senior researchers to forward this information to the PhD students, junior researchers and other interested researchers from your research group.
