SKILLS

- Analyzing large datasets using SAS or SPSS software.
- Use of online databases such as Google Scholar, PubMed and Scopus.
- Use of Adobe Creative Cloud software, including Photoshop and Illustrator.
- The essential knowledge on Microsoft office programs such as Word, PowerPoint and Excel.
- Managing an interdisciplinary team.

Stefanie Veenhuizen

CURRICULUM VITAE

PERSONAL STATEMENT

Graduated MSc student in Epidemiology and Public Health, with a passion for human health – both mental and physical. During my bachelor's in Nutrition and Health I have learned the basics of human health, ranging from introduction into Epidemiology to intercultural communication or advanced statistics. Subsequently, I specialized into (ill)health on a population level with more in-depth courses in e.g. Analytical Epidemiology, Nutritional Physiology, General Medicine and Nutrition and Cancer. On multiple occasions during and next to my studies I gained experience on working in an interdisciplinary team, next to long periods of working on an individual basis during my internship and theses. I am seeking a position which gives me the opportunity to apply this knowledge into a real-life scientific setting and work on both an individual and team basis.

EDUCATION

MSc Nutrition and Health –

Epidemiology and Public health

2017- March 2019

Wageningen University, the Netherlands

- Several courses ranging from Epidemiology and statistics using SPSS to nutrition and cancer or general medicine.
- A course in analytical epidemiology which learns the basics of Statistical Analysis Software (SAS).
- Four-month internship at the Queensland Institute of Medical Research Berghofer (QIMR B) in Brisbane, Australia (8,0/10).
- MSc thesis at Wageningen University, division Nutrition and Disease: 'Fatigue and cognitive functioning in relation to physical activity after diagnosis of colorectal cancer' (8,5/10).

BSc diploma Nutrition and Health

2013-2016

Wageningen University, the Netherlands

- Exchange of four months to the University of Helsinki, minor Global South Studies (8,5/10).
- Bachelor thesis at the division of Human Physiology: 'PPAR-delta pathway gets up-regulated upon energy deprivation in the skeletal muscle' (8,0/10).

WORK EXPERIENCE

Research Intern

2018

Queensland Institute of Medical Research Berghofer
(QIMR B), Brisbane, Australia

- Report title 'Dietary intake in relation to anxiety and depression in women with ovarian cancer' (8,0/10), publication in progress.
- Attending meetings of the Gynecological Cancers Group of the Epidemiology department.
- Working with large datasets using SAS software.

Student assistant Principles of Human Physiology

2018

Wageningen University, the Netherlands

Guiding first year Nutrition and Health students during practicals about Human and Animal Physiology.

Manager at Academic Consultancy Training

2017

Wageningen University, the Netherlands

Together with five other interdisciplinary students we were working on a project for a company, where we were asked to deliver a validation system. This project lasted for eight weeks and I was responsible for managing tasks such as keeping in contact with the external parties (the company and supervisors), handing out tasks, presenting our product and chair several meetings (8,5/10).

Student assistant Introduction to the field of Nutrition and Health research

2017

Wageningen University, the Netherlands

Guiding the groupwork process of first year bachelor students where they learned to write a blog and make a scientific poster about upcoming food trends.

Board member of the International Student Organization Wageningen

2016-2017

Wageningen, the Netherlands

A full year of voluntary part-time work in an international team where I was responsible for the promotional aspect of the organization such as creating posters, communicating about upcoming events, website editing, organizing events and many more tasks.

Pharmacy Employee

2017-now

Wageningen, the Netherlands

Part-time job: making person-bound medicine packages and answering the phone.

Receptionist at Fitland

2011-2017

Boxmeer, the Netherlands

Part-time job: arranging gym memberships and making appointments.

“It was a pleasure to host Stefanie during her internship. She fitted into our group very quickly and we were sad to see her go. She came in knowing nothing about our data and with little recent experience with data analysis but she picked up things very quickly and did an enormous amount of work in a very short time. She learned very quickly and was always willing to try new things.”

Prof. Dr. Penny Webb,
QIMR Berghofer
